

# Your family depends on you... Shouldn't you depend on Leica Geosystems?

## The Surveying Solutions, Inc. family in Standish, Michigan, depends on Leica Geosystems.

On the job, the surveyors at Surveying Solutions, Inc. expect nothing less than the best out of their equipment. Accuracy, efficiency and ease of use are paramount on the job, but at the end of the day, everyone's main concern is getting home safely to their real jobs...their families. That's why Surveying Solutions relies on Leica Geosystems to provide them with the tools they need to get their jobs done safely and ahead of schedule so they can get on with really important things like T-Ball games and dance recitals.

32 Leica Smart Rovers and SR530s connected to the Michigan Spatial Reference Network (MSRN) provide the Moms and Dads of Surveying Solutions, Inc. with centimeter-level accuracy anywhere in the state, without ever leaving a base station unattended. 1000 meter Reflector-less capabilities on their robotic total stations allow dangerous observations to be made from safe locations, keeping their field crews out of traffic and enabling them to measure previously-inaccessible locations. Leica DNA Digital

levels take the guess-work and error out of leveling while increasing the speed and accuracy of the once-tedious task. Leica Geosystems' X-Function compatibility allows for seamless transitions between these different types of measurements and lets you select the tool that's best-suited for getting your job done accurately and efficiently, ahead of schedule and under budget (keeping you out in front of those orthodontist bills).

Your local Leica Geosystems, Inc. Technical Sales Representative is happy to help you discover the true meaning of high accuracy and productive surveying operations. You too can take advantage of Leica Geosystems' Smart Technology, Reference Stations, Robotic Total Stations and GNSS (Global Navigation Satellite Systems) and get on with your most important job... spending more quality time with your future little surveyors.
